

Votiro Disarmer Where Others End, We Begin.

VOTIRO DISARMER FOR REMOVABLE DEVICES

Eliminate One of the Highest Risks to your Organization

All it Takes is One Contaminated File

Though file sharing by removable devices has largely moved to being managed via the cloud, removable media still constitutes a significant share of functions in enterprises, such as backup, storage or installation. The removable devices may be easy to use, but that is precisely what makes this channel of data flow incredibly vulnerable to malware infections. When employees or suppliers plug-in a USB or another external hard-drive device, they are putting your entire organization in jeopardy of device-borne malware contamination.

Powerful CDR Protection from any Removable Device

Votiro Disarmer for Removable Devices eliminates this high risk by detecting and scanning every plugged-in device for known and unknown malware and neutralizing any exploit that might be hidden as a payload on those removable devices. Votiro Disarmer can be installed as a designated app on any computer or deployed as sanitization stations conveniently placed around the office space.

IN LESS THAN 1 SECOND, WHILE COMPLETELY INVISIBLE TO USERS, VOTIRO DISARMER CLEANSSES ALL DEVICE-BORNE FILES FROM ANY MALWARE THREATS

Benefits

- ▶ Enjoy a proven, patented protection by an award-winning next-gen CDR technology and a Gartner Cool Vendor.
- ▶ Protect your files against the most sophisticated threats
- ▶ Drive better performance with impeccable workflow and easy access, no interruptions
- ▶ Eliminate human-error risks

- ▶ User-friendly interface
- ▶ Allows organization policies according to file type, size, department, etc.
- ▶ Scalable deployment
- ▶ Future-proof protection
- ▶ Low TCO and easy maintenance
- ▶ Zero latency

How Votiro Disarmer for Removable Devices Works

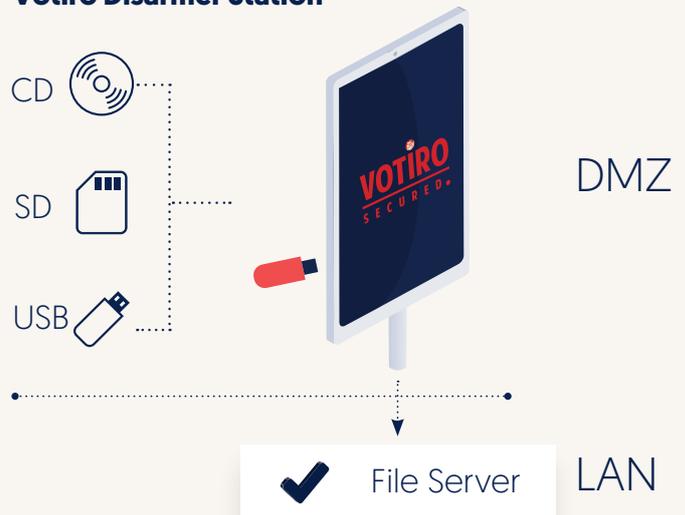

Votiro Disarmer for Removable Devices can be deployed. Disarmer stations conveniently placed around the office space, allowing MC Active Directory authentication to grant authorized access. Votiro Disarmer for Removable Devices provides a designated app to be installed on any computer, along with Votiro's management server. Once the app is installed, the workstation is automatically

updated with the latest Votiro updates and organization policies via the central management server. Once deployed, users can simply select files from any removable device such as USB, hard-drive, CD or flash drive. The selected files are then sanitized by Votiro Disarmer and published to a safe network location, where they are safe to access and use.

Votiro Disarmer End Point

Votiro Disarmer Station

Votiro Disarmer for Removable Devices allows you to *Communicate, Collaborate, and Perform* safely, at ease, and without disrupting your workflow.
