# One Dashboard. All Needs.

## Attack Surface Management

Automatic detection & classification of your on-prem & cloud IT assets

## Continuous Security Monitoring

Instant detection of misconfigured, vulnerable or outdated IT assets

## Third-Party Risk Detection

Ongoing monitoring of third parties that expose or leak your data

## Cyber Threat Intelligence

Continuous monitoring of malicious activities against your company

## Dark Web Monitoring

Rapid detection of data breaches, compromised systems or users

1. Just enter a company name
2. See what hackers see
3. See what hackers do

# Ultimate Visibility. Smart Prioritization.

# Compliance, Security, and Vendor Risk Monitoring

## Simplify Compliance

Meet visibility, inventory & security monitoring requirements

## Prevent Data Breaches

Get instant alerts on vulnerable or misconfigured IT assets

## Outpace Cybercriminals

Respond without delay to security incidents, data leaks or phishing

## Cut Operational Costs

Ensure a holistic visibility of your assets for risk-based & threat-aware patching

## Neutralize Human Error

Receive instant alerts on shadow IT, abandoned or forgotten assets

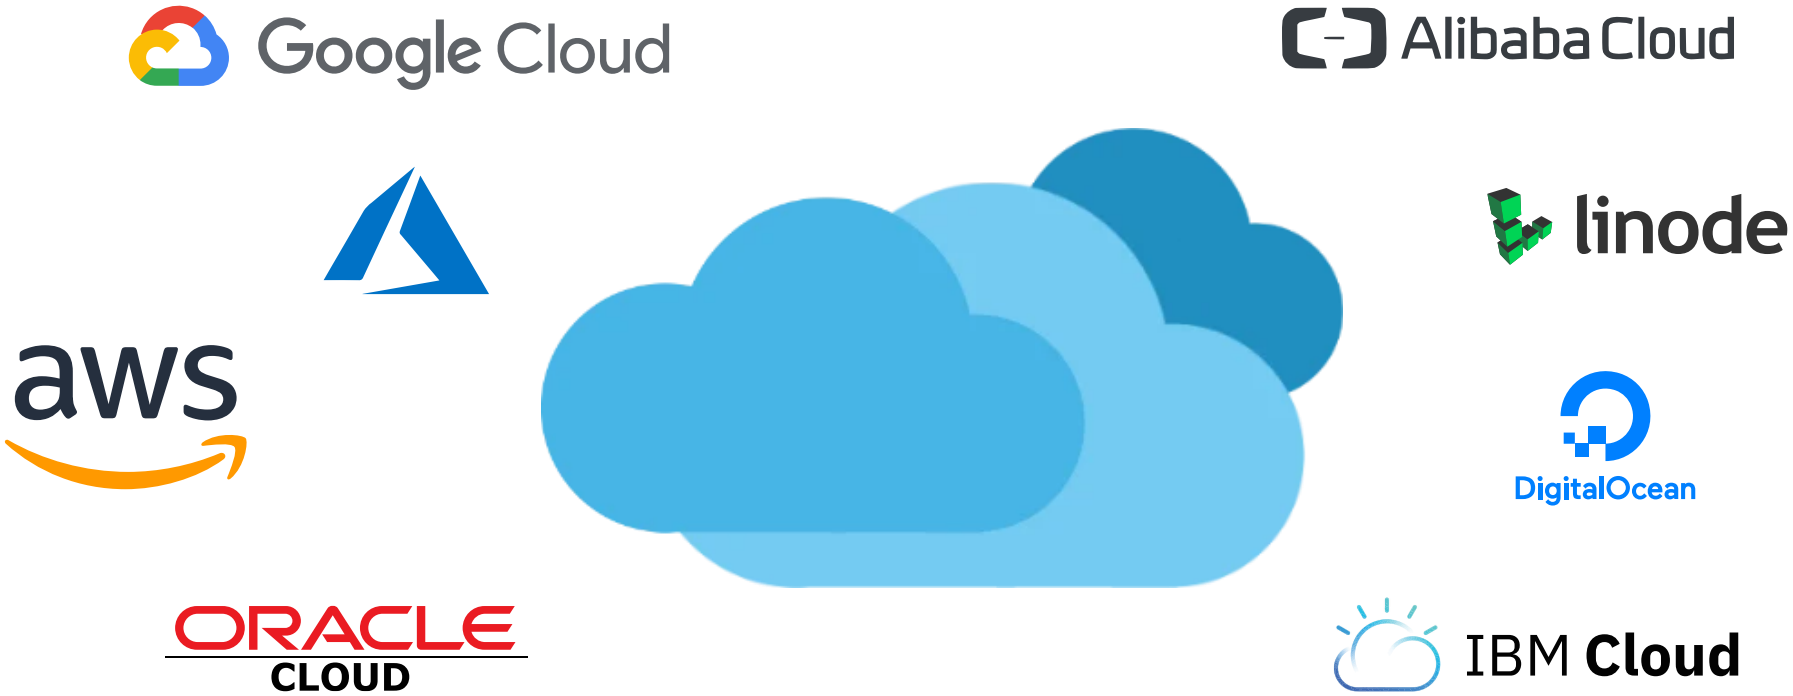
## Reduce Third-Party Risk

Detect exposure of your data by vendors and third parties before hackers do

# Threat Intelligence and Dark Web Monitoring

Compliant with "Legal Considerations when Gathering Online Cyber Threat Intelligence and Purchasing Data from Illicit Sources" guidelines by the U.S. Department of Justice

# Cloud Security Posture Management



Monitoring of misconfigured or exposed cloud instances

# Network Infrastructure and SaaS Solutions Monitoring

CVE COMPATIBLE

Monitoring of 20,000+ network CVE-IDs

slack

Akamai

Firebase

Monitoring of misconfigured or exposed SaaS/PaaS instances

# Containers and CI/CD Pipeline Monitoring

GitLab

GitHub

Bitbucket

Detection of exposed secrets in repositories

docker

Detection of secrets in container images

kubernetes

Monitoring of misconfigured container orchestration tools

# Meet Regulatory Requirements with ImmuniWeb® Discovery

## US HIPAA, NYSDFS & NIST SP 800-171

Helps fulfill monitoring requirements
under the US laws & frameworks

## EU DORA, NIS 2 & GDPR

Helps fulfill monitoring requirements
under the EU laws & regulations

## PCI DSS, ISO 27001, SOC 2 & CIS Controls®

Helps fulfill monitoring requirements
under the industry standards

# Frequently Asked Questions

**Q** How many domains and IT assets are included in one subscription?

**A** There is no hard limit on the number of domains, on-premise or cloud IT assets, or security incidents per company, please reach out to us for a quote. If you have several interrelated brands or companies, you may have one subscription but separate dashboards at no additional cost. Each subscription has an unlimited number of users with granular permissions to access specific sections of your dashboard(s).

**Q** What is the standard subscription duration?

**A** The default subscription length is one year, please reach out to us may you need another duration. For a large number of licenses, which may be used for M&A due diligence or similar purposes, we may also provide one-time discovery per each company.

**Q** Do I need to install any on-premise agents or software?

**A** No, we normally detect 99.9% of externally visible and accessible IT assets located both on premises or in a cloud by using a wide spectrum of OSINT-based methodologies, network reconnaissance, and our proprietary sets of Big Data. To start a Discovery project, just enter a company name: your interactive dashboard will be ready within 3 days. While your subscription is active, we will continuously monitor your external attack surface for any changes and automatically add new IT assets at no additional cost.

**Q** Can I manually add IT assets to my dashboard?

**A** Yes, once your dashboard is active, you can add your on-premise and cloud assets manually for continuous security monitoring. You can also use our one-click functionality to import your assets from Excel file and automatically classify them by groups.

**Q** How flexibly can I customize security notifications?

**A** You can automatically classify your assets and incidents based on their properties, history or nature. Eventually, all newly discovered assets or incidents will be automatically placed into a specific group, as well as any assets or incidents with updates. You can setup a granular notifications per user, per tab and per group, ensuring that all relevant people on your side will be getting actionable alerts in a timely manner without any noise.

**Q** Where will my data reside?

**A** By default, your data resides on ImmuniWeb's servers in Switzerland and Canada: both countries have an adequacy decision by the European Commission (EC) for the EU GDPR compliance purposes. Upon request, your data can be stored in another jurisdiction of your preference for an extra cost. Your data can be securely deleted at any time upon your request. No public cloud providers are used to store your data.

**Q** Do you offer special pricing for government, academia and non-profit organizations?

**A** Yes, we do offer advantageous pricing for government, academia and non-profit organizations. Please reach out to our sales team to see whether your organization qualifies.

# Why Choosing ImmuniWeb® AI Platform

Because You Deserve the Very Best

# Trusted by 1,000+ Global Customers

*We used ImmuniWeb for some of our products and we have been highly satisfied from the provided service as valid vulnerabilities with no false positives were identified. The report ImmuniWeb delivered to us was quite clear in terms of the classifications and the description of the identified vulnerabilities, linking to the corresponding CVE and the fix recommendations. We recommend ImmuniWeb to other vendors to make their web products secure*

ebay

*We believe ImmuniWeb platform would definitely address the common weaknesses seen in manual assessments. The AI-assisted platform not only automates the assessments, but also, executes them in a continuous, consistent and reliable fashion. Admittedly, the platform would definitely add quick wins and great ROI to its customers on their investment.*

DP WORLD

*The report was very detailed and clearly explained the risk at executive level, a great assistance in taking the report to senior management.*
*I would have no hesitation in recommending ImmuniWeb.*

Celgene

*ImmuniWeb is an efficient and very easy-to-use solution that combines automatic and human tests. The results are complete, straightforward and easy to understand. It's an essential tool for the development of the new digital activities*
